GENERAL INFORMATION

DIRECTIONS FOR USE + APPLICATION RATES

UREA: 2-3 qt (64-96 oz) per ton of urea

CONTAIN ADVANCED may be used to treat urea prior to application to the field - including pre-treatment. Under certain temperature and humidity conditions, urea blended with **CONTAIN ADVANCED** may stick together. Application of urea to the field is recommended soon after treatment to provide the best results.

LIQUID FERTILIZER: 1.5 qt (48 oz) per ton of UAN (28%, 30%, or 32%)

CONTAIN ADVANCED may be mixed with liquid fertilizers such as aqua ammonia or other liquid ammoniacal or urea nitrogen fertilizers. Liquid fertilizers containing high levels of phosphate should not be used with **CONTAIN ADVANCED**. If pesticides are added to the tank mix in conjunction with liquid fertilizers, a compatibility jar test should be performed prior to large scale application to the field. For best results, use treated UAN solution soon after mixing.
